ABSTRACT

This is the 17th year of statewide student testing under the Arizona Student Achievement Program. To fulfill the requirements of Arizona law, a nationally standardized, norm-referenced achievement test in the subjects of reading, language, and mathematics must be adopted and implemented for Arizona schools. For the 1996-97 school year, the State Board of Education mandated testing at grades 3 through 12 with the Stanford Achievement Test, Ninth Edition (Stanford 9). This test was administered statewide to 510,849 Arizona students in the spring of 1997, subtests in reading, language, and mathematics. This state report appendix provides school, district, county, and state level scores representing typical student performance on the Stanford 9, with separate scores for each subject test. The three scores cannot be averaged to produce one overall score for a reporting entity. These scores are called individual percentile rank scores because they are developed from the distribution of individual student scores. One lengthy table is provided for each of the three subject areas. (SLD)

Introduction

This is the seventeenth year of statewide student testing under the Arizona Student Achievement Program. To fulfill the requirements of Arizona Revised Statutes Section 15-741 through 744, a nationally standardized, norm-referenced achievement test in the subjects of reading, language, and mathematics must be adopted and implemented for use in Arizona schools.

For the 1996-97 school year, the Arizona State Board of Education mandated testing at grades 3 through 12 and contracted with Harcourt Brace Educational Measurement, publisher of the *Stanford Achievement Test,* Ninth Edition (Stanford 9*)*. This test was administered statewide to 510,849 Arizona students in grades 3-12 during the spring of 1997. Three subtests in the academic content areas of reading, language and mathematics were administered to all students.

This *State Report Appendix* provides school, district, county and state level scores representing typical student performance on the 1996-97 administration of the Stanford 9. Sections A, B, and C provide separate scores, one for each subject tested. The three scores cannot be averaged together to produce one overall score for a school, district, county or the state. The scores are called *individual percentile rank* scores because they are developed from the distribution of individual student scores.
